

CALL FOR PAPERS

MEDHOCNET 2012

11th Annual Mediterranean Ad Hoc Networking Workshop

<http://medhocnet2012.cs.ucy.ac.cy>

June 19-22, 2012, Ayia Napa, Cyprus

Important dates:

Paper Submission deadline

(extended): March 12, 2012

Acceptance Notification:

April 16, 2012

Camera Ready Paper:

May 1, 2012

General Chairs

Andreas Pitsillides

University of Cyprus

Christos Douligeris

University of Piraeus

TPC Co-Chairs

Vasos Vassiliou

University of Cyprus

Geert Heijenk

University of Twente

Jaudelice Oliveira

Drexel University

Tutorials Chair

Tomasso Melodia

SUNY, USA

Publicity Chairs

Habib M. Ammari

University of Michigan-Dearborn

Jaime Lloret Mauri,

UPV Valencia, Spain

Steering Committee:

Ian F. Akyildiz

Georgia Inst. of Technology

Khalidoun Al Agha

Université Paris-Sud XI

Luigi Fratta

Politecnico di Milano

Mario Gerla

UCLA

Farouk Kamoun

ENSI, Tunisia

Giovanni Pau

UCLA

Guy Pujolle

UPMC - Paris 6

Wireless ad hoc networks have attracted the attention of the research community in the last several years, mostly because of the growing interest in a connected world, where people are – virtually – omnipresent. Next generation wireless networks, heterogeneous access technologies, ad-hoc and sensor networks, and new Internet technologies are part of this pervasive environment.

MED-HOC-NET 2012, as its previous 10 predecessors focuses on communication networking research, especially on new issues in Wireless Ad-Hoc Networks, which include Application Scenarios, Data-centric Operation, Autonomous Organization, Optimization and Control, Operation under Intermittent Connectivity, and Service Creation and Support. The scope of the workshop also includes new and exciting challenges in wireless mesh networks, sensor networks, vehicular networks, delay tolerant and opportunistic networks, and the opportunities provided or stemming from the social networks paradigm.

As a major annual international workshop, the 11th MED-HOC-NET aims to serve as a platform for researchers and visionaries from the academia, the research laboratories, and the industry to present their latest work.

Following recent successful conferences in Sicily (2006), Corfu (2007), Palma de Mallorca (2008), Haifa (2009), Juan-les-pins (2010), and Favignana Island (2011), Med-Hoc-Net 2012 will take place in Ayia Napa (CYPRUS).

Areas of interest include, but are not limited to:

- Routing algorithms and protocols
- MAC protocols, scheduling, power control, and resource allocation
- Transport layer protocols for multi-hop networks
- Middleware for ad hoc networks
- Application driven architectures and protocols
- Sensor network applications and protocols
- Vehicular networks
- Cognitive radio networks
- Integration of ad hoc networks with wireless access networks
- Internet access systems to Ad Hoc Networks.
- Internet services over Ad Hoc Networks
- Ad Hoc Network deployments using Internet protocol.
- Implementations, testbeds, and prototypes
- Technology related issues
- Self-organization and network (re)configuration
- Optimization models and algorithms
- Resource and service discovery
- Energy-efficient networking
- Exploitation of social and mobility patterns for opportunistic networking
- Mobile social networks
- Security and privacy
- Positioning and localization
- Participatory and urban sensing
- Underwater wireless networks
- Green networking

Paper Submission

Submitted papers must represent original material that is not currently under review in any other conference or journal, and has not been previously published. All submissions should be written in English with a maximum of eight (8) printed pages (in Two-Column [IEEE Conference Format](#)), including text, figures, and references. Papers should be submitted through EDAS at <http://edas.info/N11539>
